 Vergleichen Sie zuerst die Materialliste mit Ihrem Paketinhalt! Bitte haben Sie Verständnis, dass Beanstandungen nur im nicht aufgebauten Zustand bearbeitet werden können!

 First compare the list of materials with your package contents! Please understand that complaints can be processed in the non-built status only!

 Commencez par comparer la liste du matériel avec le contenu de votre paquet! Sachez que nous traitons uniquement les réclamations concernant le matériel à l'état non monté!

 Vergelijk eerst de lijst van materialen met de inhoud van uw pakket! Reclamaties kunnen alleen in behandeling worden genomen zolang de onderdelen nog niet zijn gemonteerd!

 Start med at kontrollere materialelisten med indholdet af den leverede pakke! Vi gør venligst opmærksom på at reklamationer kun kan behandles for materialer som ikke er blevet bearbejdet!

 En primer lugar, compare la lista de material con el contenido del paquete. Rogamos entienda que las reclamaciones sólo pueden ser tramitadas antes de montar el objeto!

 Confrontate questa distinta materiali prima con il contenuto del pacchetto! Vi preghiamo di comprendere che eventuali reclami possono essere accolti solo prima del montaggio!

 Nejprve překontrolujte obsah balení podle materiálového listu! Mějte pochopení pro to, že případnou reklamaci se můžeme zabývat pouze tehdy, když díly nebudou smontované!

 Najprv porovnajte zoznam materiálu s obsahom balíka! Prosíme, majte na pamäti, že reklamácie môžu byť spracované iba v prípade, ak produkt nie je zmontovaný!

 Najprej primerjajte seznam materialov z vsebino vašega paketa! Upoštevajte, da lahko pritožbe obravnavamo le v nesestavljenem stanju!

 Najpierw porównaj listę materiałów z zawartością paczki! Prosimy o wyrozumiałość, że reklamacje mogą być rozpatrywane tylko w przypadku produktów, które nie zostały jeszcze zmontowane!

 Prvo provjerite popis sadržaja i usporedite ga s onim što se nalazi u vašoj pošiljci! Imajte na umu da možemo obraditi pritužbe samo ako predmet nije sastavljen!

 Először hasonlítsa össze az anyaglistát a csomag tartalmával! Kérjük, vegye figyelembe, hogy a reklamációkat csak a termék összeszerelése előtt tudjuk feldolgozni!

 Sådan fungerer styret. Brug den til at regulere udstødningsluften efter dine egne ønsker

 Aquí está representada la forma de funcionamiento de la tabla. Regule con ello el aire de salida según sus propios deseos.

 Viene illustrato il principio di funzionamento della tavoletta di regolazione della ventilazione. Con essa si può regolare a piacere la ventilazione

 Zde je zobrazená funkce desky. Regulujte s ní odsávací vzduch dle Vašeho přání.

 Tu je znázornený princíp fungovania dosky. Pomocou nej môžete regulovať odvod vzduchu podľa vlastných potrieb.

 Tukaj si lahko ogledate delovanje plošče. Z njo lahko uravnavate izpušni zrak po lastnih željah.

 Poniżej przedstawiono sposób działania panelu. W ten sposób można regulować przepływ powietrza wywiewanego zgodnie z własnymi preferencjami.

 Ovo ilustrira kako ploča radi. Koristite je za podešavanje ispušnog zraka prema svojim željama.

 Itt látható a deszka működési elve. Ezzel saját igényeinek megfelelően szabályozhatja a levegő áramlását.

 Der Materialbedarf richtet sich nach Ihrer Hausgröße. Beachten Sie die Lagerungs- und Montagehinweise Ihres gewählten Dachbelags, insbesondere zu den erforderlichen Umweltbedingungen (z.B. Temperatur und Luftfeuchte) für eine erfolgreiche Montage. Das Dach ist nicht begehbar. Die Konstruktion ist für eine Gesamtbelastung (Schnee, Wind) und nicht für eine Punktbelastung ausgelegt. Zur Montage muss das Dach in jedem Fall sauber und trocken sein. Lose Bestandteile sind vorher zu entfernen. Die Abdichtung der Dachflächen zu angrenzenden Bauteilen mit Bitumendichtmasse/Silikon ist bauseits zu lösen!

 The amount of material required depends on the size of your house. Please follow the storage and installation instructions for your chosen roofing material, paying particular attention to the environmental conditions (e.g. temperature and humidity) required for successful installation. The roof is not accessible. The structure is designed to withstand a total load (snow, wind) and not a point load. The roof must always be clean and dry before installation. Any loose parts must be removed beforehand. The client is responsible for sealing the roof surfaces where they meet adjacent building components using bituminous sealant/silicone!

 La quantité de matériaux nécessaire dépend de la taille de votre maison. Respectez les consignes de stockage et de pose de la couverture de toiture que vous avez choisie, notamment en ce qui concerne les conditions environnementales requises (par exemple, la température et l'humidité de l'air) pour une pose réussie. Le toit n'est pas praticable. La structure est conçue pour supporter une charge globale (neige, vent) et non une charge ponctuelle. Pour le montage, le toit doit impérativement être propre et sec. Les éléments non fixés doivent être retirés au préalable. L'étanchéité des surfaces de toiture au niveau des éléments de construction adjacents, réalisée à l'aide d'un mastic bitumineux ou de silicone, doit être assurée par le maître d'ouvrage !

 De benodigde hoeveelheid materiaal is afhankelijk van de grootte van uw huis. Houd rekening met de opslag- en montage-instructies van de door u gekozen dakbedekking, met name wat betreft de vereiste omgevingsomstandigheden (bijv. temperatuur en luchtvochtigheid) voor een succesvolle montage. Het dak is niet beloopbaar. De constructie is ontworpen voor een totale belasting (sneeuw, wind) en niet voor een puntbelasting. Voor de montage moet het dak in ieder geval schoon en droog zijn. Losse onderdelen moeten vooraf worden verwijderd. Het afdichten van de dakvlakken tegen aangrenzende bouwdeelen met bitumenafdichtingsmiddel/siliconen dient door de opdrachtgever te worden uitgevoerd!

 Materialebehovet afhænger af husets størrelse. Overhold opbevarings- og monteringsanvisningerne for det valgte tagbelægning, især hvad angår de nødvendige miljøforhold (f.eks. temperatur og luftfugtighed) for en vellykket montering. Taget er ikke begangbart. Konstruktionen er dimensioneret til en samlet belastning (sne, vind) og ikke til punktbelastning. Taget skal under alle omstændigheder være rent og tørt ved montering. Løse dele skal fjernes på forhånd. Tætning af tagfladerne mod tilstødende bygningsdele med bitumen-tætningsmasse/silikone skal udføres af bygherren!

 La cantidad de material necesaria depende del tamaño de su vivienda. Tenga en cuenta las instrucciones de almacenamiento y montaje del revestimiento de tejado que haya elegido, especialmente en lo que respecta a las condiciones ambientales necesarias (por ejemplo, temperatura y humedad del aire) para que el montaje se realice con éxito. No se puede pisar el tejado. La estructura está diseñada para soportar una carga total (nieve, viento) y no para una carga puntual. Para el montaje, el tejado debe estar siempre limpio y seco. Se deben retirar previamente los elementos sueltos. ¡El sellado de las superficies del tejado con los elementos constructivos adyacentes mediante masilla bituminosa o silicona debe ser realizado por el cliente!

 Il fabbisogno di materiale dipende dalle dimensioni della vostra casa. Attenetevi alle istruzioni di stoccaggio e montaggio della copertura scelta, in particolare per quanto riguarda le condizioni ambientali necessarie (ad es. temperatura e umidità dell'aria) per un montaggio corretto. Il tetto non è calpestabile. La struttura è progettata per sopportare un carico complessivo (neve, vento) e non un carico puntuale. Per il montaggio, il tetto deve essere in ogni caso pulito e asciutto. Eventuali elementi non fissati devono essere rimossi in precedenza. L'impermeabilizzazione delle superfici del tetto in corrispondenza degli elementi costruttivi adiacenti con mastice bituminoso/silicone è a carico del committente!

 Spotřeba materiálu závisí na velikosti vašeho domu. Dodržujte pokyny pro skladování a montáž zvolené střešní krytiny, zejména pokud jde o nezbytné podmínky prostředí (např. teplotu a vlhkost vzduchu) pro úspěšnou montáž. Střecha není přístupná. Konstrukce je navržena pro celkové zatížení (sníh, vítr), nikoli pro bodové zatížení. Pro montáž musí být střecha v každém případě čistá a suchá. Volné části je třeba předem odstranit. Utěsnění střešních ploch vůči sousedním stavebním prvkům pomocí bitumenové těsnicí hmoty/silikonu musí zajistit stavebník!

 Potreba materiálu závisí od veľkosti vášho domu. Dodržiavajte pokyny na skladovanie a montáž zvolenej strešnej krytiny, najmä pokiaľ ide o nevyhnutné podmienky prostredia (napr. teplota a vlhkosť vzduchu) potrebné na úspešnú montáž. Na strechu sa nesmie vstúpiť. Konštrukcia je navrhnutá na celkové zaťaženie (sneh, vietor), nie na bodové zaťaženie. Pred montážou musí byť strecha v každom prípade čistá a suchá. Voľné časti je potrebné vopred odstrániť. Utesnenie strešných plôch voči susedným konštrukčným prvkom pomocou bitúmenovej tesniacej hmoty/silikónu je potrebné zabezpečiť na mieste!

 Potrebna količina materiala je odvisna od velikosti vaše hiše. Upoštevajte navodila za skladiščenje in montažo izbrane strešne kritine, zlasti glede potrebnih okoljskih pogojev (npr. temperature in vlažnosti zraka) za uspešno montažo. Na streho ni mogoče stopiti. Konstrukcija je zasnovana za skupno obremenitev (sneg, veter) in ne za točkovno obremenitev. Za montažo mora biti streha v vsakem primeru čista in suha. Ohlapne dele je treba predhodno odstraniti. Tesnjenje stičnih površin strehe s sosednjimi elementi z bitumensko tesnilno maso/silikonom mora izvesti naročnik!

 Ilość potrzebnego materiału zależy od wielkości domu. Należy przestrzegać wskazówek dotyczących przechowywania i montażu wybranego pokrycia dachowego, zwłaszcza w zakresie warunków środowiskowych (np. temperatury i wilgotności powietrza) niezbędnych do prawidłowego montażu. Po dachu nie można chodzić. Konstrukcja jest przystosowana do obciążenia całkowitego (śnieg, wiatr), a nie do obciążenia punktowego. Przed montażem dach musi być w każdym przypadku czysty i suchy. Należy wcześniej usunąć luźne elementy. Uszczelnienie powierzchni dachowych przylegających do elementów budowlanych za pomocą masy uszczelniającej na bazie bitumu/silikonu należy wykonać we własnym zakresie!

 Količina potrebnog materijala ovisi o veličini vaše kuće. Molimo vas da slijedite upute za skladištenje i ugradnju odabranog krovnog materijala, obraćajući posebnu pozornost na uvjete okoliša (npr. temperaturu i vlažnost) potrebne za uspješnu ugradnju. Krov nije dostupan. Konstrukcija je projektirana za podnošenje ukupnog opterećenja (snijeg, vjetar), a ne točkastog opterećenja. Krov mora uvijek biti čist i suh prije ugradnje. Sve labave dijelove potrebno je ukloniti unaprijed. Kupac je odgovoran za brtvljenje krovni površina na mjestima gdje se susreću s pripadajućim građevinskim elementima pomoću bitumenske brtvila ili silikona!

 Az anyagszükséglet a ház méretétől függ. Kérjük, vegye figyelembe a választott tetőburkolat tárolási és szerelési utasításait, különös tekintettel a sikeres szereléshez szükséges környezeti feltételekre (pl. hőmérséklet és páratartalom). A tetőn nem lehet járni. A szerkezetet teljes terhelésre (hó, szél) tervezték, nem pedig pontszerű terhelésre. A szereléshez a tetőnek minden esetben tisztának és száraznak kell lennie. A laza alkatrészeket előzetesen el kell távolítani. A tetőfelületek és a szomszédos építőelemek közötti tömítést bitumenes tömítőanyaggal/szilikonnal a megrendelőnek kell elvégeznie!
